

Navigation Update Instructions

Thank you for purchasing the latest map data for your navigation system. Please ensure you follow all the steps closely for a successful update.

Before you begin, ensure you have a USB that is at least 1GB and maximum 8GB.

You will have received a link to download the update file from the Alpine Electronics website. If you have not done so already, please proceed to download the update file to your computer.

After the file has been downloaded to your computer, extract the file.

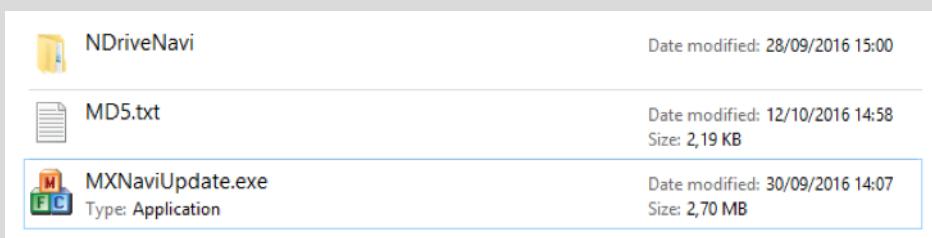

The file will contain the following -

“NDriveNavi” Folder

“MD5.txt” file

“MXNaviUpdate.exe” file

Ensure all three files are copied to the root of the USB - as pictured below.

STEP ONE

With the device turned off, insert the USB into the device.

Turn on the device.

The device will automatically start the Navigation Update Tool, as pictured to the right. Click the 'Update' Button to commence the update.

Navigation Update Tool V1.0

WELCOME

Tips: Do not exit program or USB attached devices, otherwise it may cause navigation normal start failure and user data loss.

Update

Exit

STEP TWO

You will then be prompted to confirm the update, to do so select the 'Yes' button.

Navigation Update Tool V1.0

WELCOME

Tips: Do not exit program or USB attached devices, otherwise it may cause navigation normal start failure and user data loss.

Update

Exit

STEP THREE

After confirming, the update will commence, as pictured. Ensure that you do not turn the device off or interrupt the update process.

Navigation Update Tool V1.0

Navigation Version

Do not cut off power or perform other operations during update process

Tips: It may cause navigation normal start failure and user data loss.

Update

Exit

STEP FOUR

A message will appear notifying you that the update has been installed successfully.

Remove the USB from the device, and the device will restart automatically.

Navigation Update Tool V1.0

WELCOME

After 5 seconds restart the system

Tips: Do not exit program or USB attached devices, otherwise it may cause navigation normal start failure and user data loss.

Update

Exit

To see which map version is installed, go to MENU > MY NDRIVE > MY MAPS
