

# iLX-507A / iLX-F509A / iLX-F511A / i905 Series

## Change The Start-Up Logo

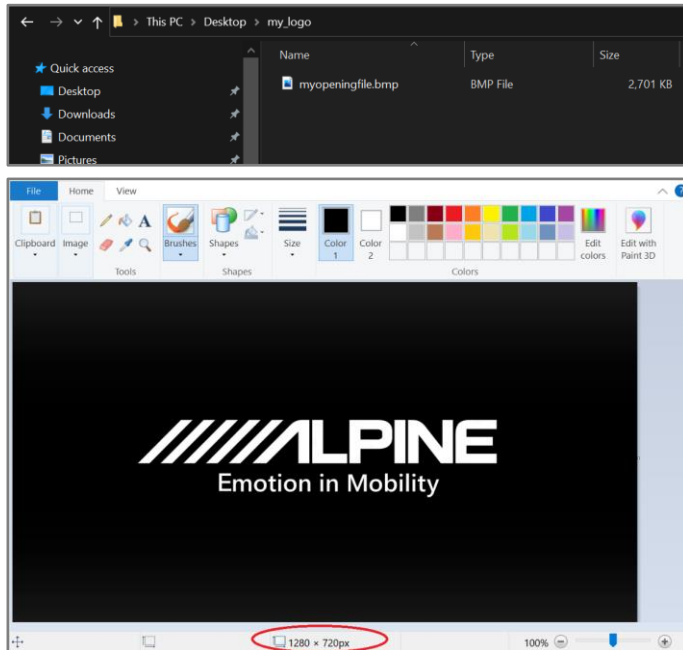

### Generate the Car by Car Start-Up Logo

- 1 Open the link: <https://logotool.alpine-europe.com/>
- 2 On the site click the “Browse” button

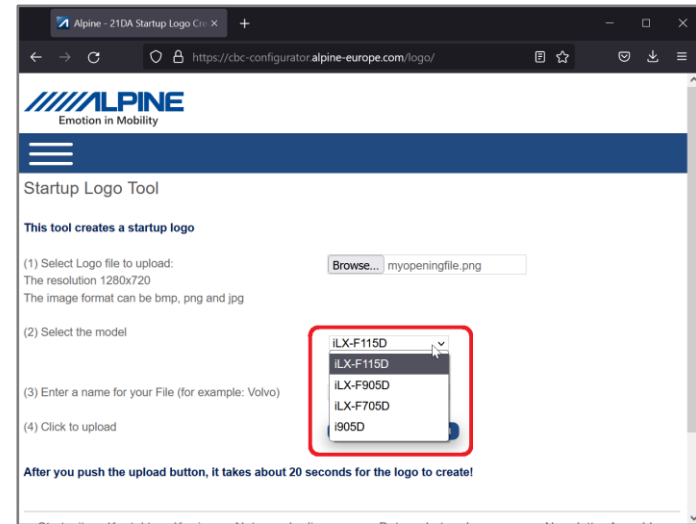

- 3 Select your logo, make sure the logo file resolution is 1280x720px.

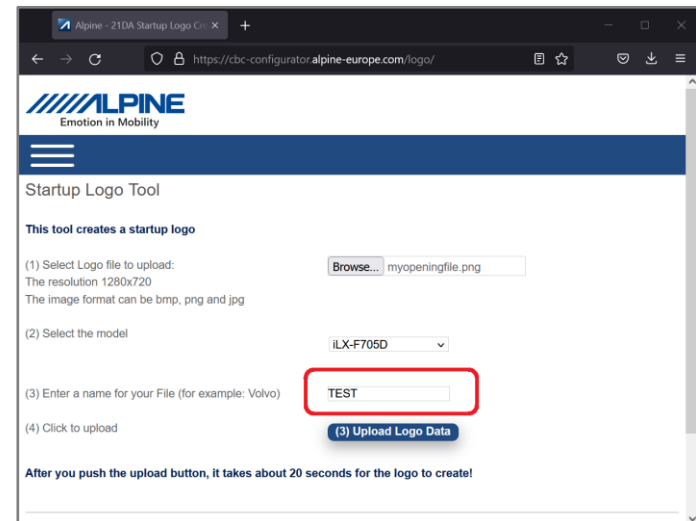

### Generate the Car by Car Start-Up Logo

- 4 Select the Head Unit model.

- 5 Enter a Name for your file (for example your name or vehicle).

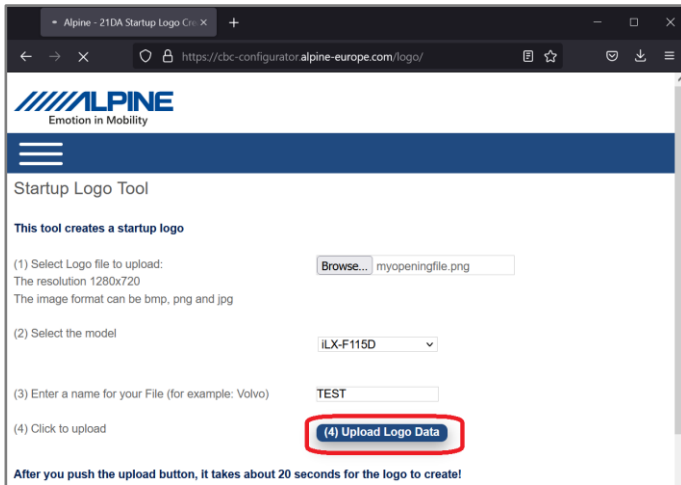

# iLX-507A / iLX-F509A / iLX-F511A / i905 Series

## Change The Start-Up Logo

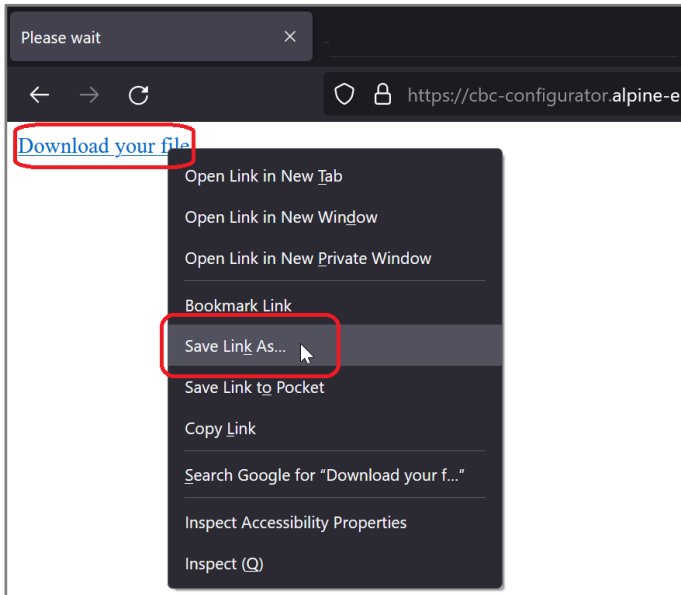

### Generate the Car by Car Start-Up Logo

- 6 Push the “Upload Logo Data” button and wait for 30 seconds until the download link is shown.

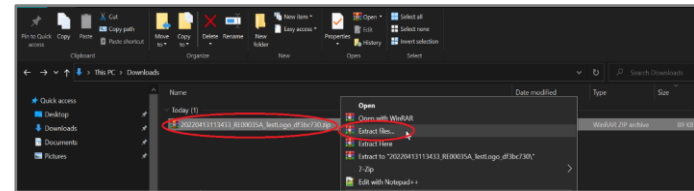

- 7 Right-Click the link and select “Save Link As...”. Select a location on your computer. Open the location by using the File Explorer.

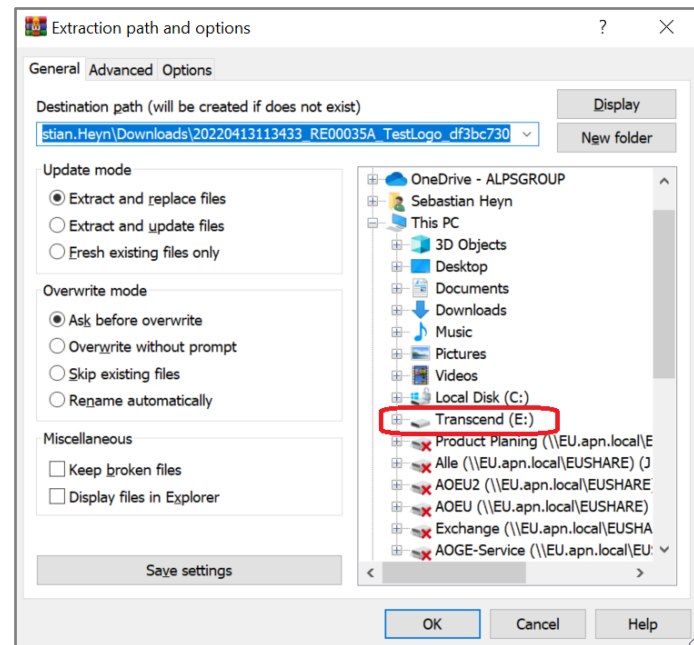

### Generate the Car by Car Start-Up Logo

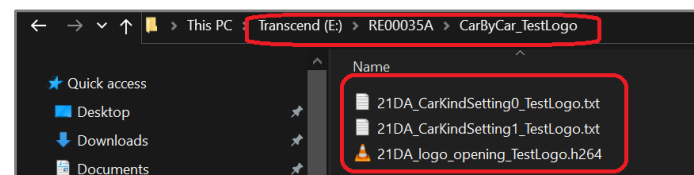

- 8 Open the file with an unpack utility, like WinZip, rar or 7z. Right Click the file and select “Extract Files to...”.

- 9 Select your (empty and FAT32 formatted) USB stick and click “OK”.

- 10 The folder structure on the USB stick will be created. It should look similar to this:

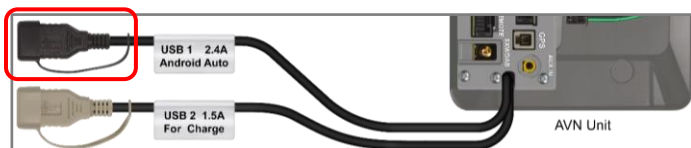

# iLX-507A / iLX-F509A / iLX-F511A / i905 Series

## Change The Start-Up Logo

### Update the Car by Car Start-Up Logo

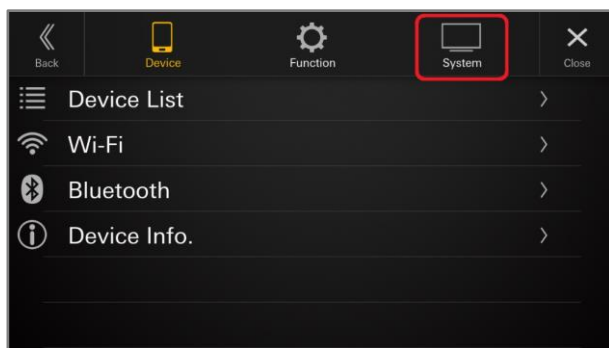

**11** Connect USB stored Car by Car data with black connector.

**12** Insert the USB stick into the Alpine Head Unit and open the menu. Select "Setup".

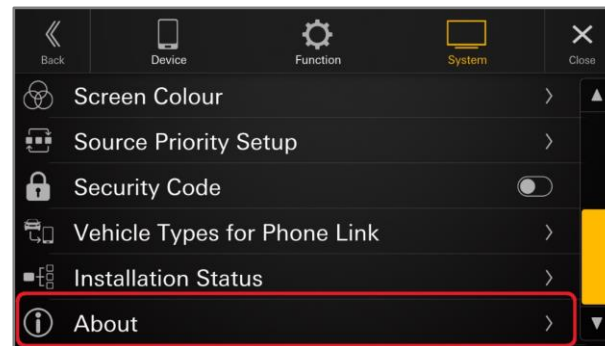

**13** Select "System".

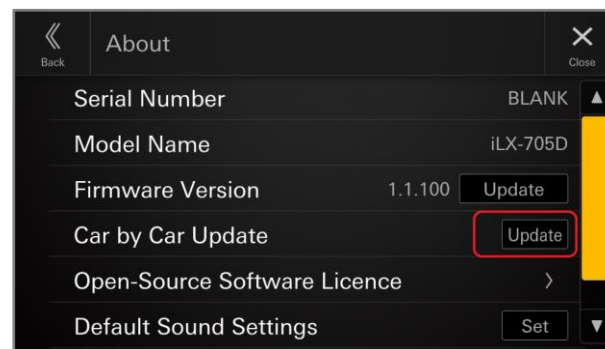

### Update the Car by Car Start-Up Logo

**14** Scroll down to the bottom. Select "About".

**15** If you created the USB stick correctly, the *Car by Car Update* "Update" button will be enabled.

**16** Click "OK" to confirm you want to customize the unit.
